ClO2 : Chlorine-Dioxide, O-Cl-O

-----  
If you have recently been inoculated with the big four COVID-19 vaccines, and are feeling and sensing buyers remorse this protocol is for you. This protocol is also known as MMS, referring to the name of a intermediary Chlorine containing compound. MMS is not Methyl Methane-Sulfonate, and MMS is also not Miracle Mineral Supplement, but according the Dr. who we here are referring to, MMS stands for :

MMS : NaClO2 = Sodium Chlorite + Activator (Citric Acid) (name by Jim Humble)  
<https://andreaskalcker.com/en/cds-clo2/abbreviations-and-meanings-mms-cds.html>

While inhaling ClO2 vapor generated from Chlorox and your urine, you can clear your airways from COVID-19. When your inoculated with a COVID-19 vaccine, the COVID-19 virus/vaccine/protein can be anywhere in your body. If the ClO2 molecules could visit all parts of your body, it would do the trick. Sadly ClO2 is a gas vapor only.

One can, however, store the active ClO2 molecules inside a mineral water solution which can be drunked, when taking care the concentrations are correct [2][7]. When you have this mineral water solution with ClO2 all essential body parts will be visited with the active ClO2 molecules. The human body has a water percentage ranging from 50% up to 75%.

For further details visit the webpage [8] and make sure to watch Dr. Kalcker's two rumble videos [1][2]:

"Chlorine dioxide was used to safely sterilize the senate offices after an anthrax attack in Washington DC in 2001 and it has been used to safely clean up Ebola virus hot zones."  
-- Emma Young NewScientist, NSRDEC Public Affairs U.S. Army Research, Development and Engineering Command (RDECOM) p.16
